bite

AIM 2026 · AALEN
EARLY STAGE · HELP US SHAPE IT

*tonight's menu*

# Real food, real people, your neighbourhood.

Bite connects you with home cooks nearby. Share a home-cooked meal, split the cost of the groceries, and pay less than takeaway.

No. 1 — *The idea* — BLABLACAR FOR DINNER

A neighbour is already cooking tonight. You pull up a chair and pay an equal share of the groceries, not a restaurant price.

No. 2 — *Three ways to eat* — YOUR CHOICE

Pick-up · Eat together at a neighbour's table · Cook together, then eat.

No. 3 — *A fair price* — COST, NOT PROFIT

Guests pay their share of the ingredients plus a 12% Bite fee, all in the app. No cash, no mark-up, and the host's own dinner gets cheaper too.

No. 4 — *Safe by design* — HOUSE RULES

Verified hosts (ID, video call, tasting), small groups, in-app payments, GDPR-first data.

No. 5 — *Where we are* — EARLY STAGE

Tested with a survey of 70+ people and interviews; the prototype works. Now we want to hear from you.
